Subject: Re: Fw: recommended parameters for well water testing

Vicky,

I would be happy to provide input and would frankly like to coordinate among our site team (Rupert and Chase) on that input, but need to know the basis for assigning importance. Ex. 5 - Deliberative

Subject: Fw: recommended parameters for well water testing

Jon and Linda have asked us to review/recommend a list of parameters that would provide a good baseline for assessing potential effects from hydraulic fracturing/gas well drilling. Please take a look at the comparison of lists from other organizations that is in the Penn State Extension Service document attached here, for starters. Ex. 5 - Deliberative

Please provide any input by COB Tuesday, September 4th. We can meet to discuss if folks would like. Thanks.--Vicky

Subject: Fw: recommended parameters for well water testing

Vicky, Jon has been providing assistance to the Marcellus Round Table discussions. One thing we comment on was the parameters they were recommending for testing should be reviewed. We volunteered to send them a list of parameters for sampling GW(private wells). We have the parameters used in Dimick, a list provided from several organizations provided below and the parameters ORD is using. Can you provide us with what parameters are important to do a baseline for private drinking water wells to assess if Fracking is of concern.
